

Multistack Modular Chillers with True Variable Speed Compressors

- Multistack invented the modular chiller
- Available in 10- through 85-Ton Modules
- Dual, true variable speed scroll compressors with dual refrigeration circuits
- Add chiller capacity by adding modules as needed, when needed
- Create chiller arrays up to 14 modules with 10- through 70-ton modules
- Available in Total Access configurations for easy serviceability—ideal for mission-critical applications
- Also available as Dedicated Heat Recovery Chillers (DHRC) using R-134a refrigerant for hot water up to 180 F
- Acoustic panels available
