

AuraGreen™

ENERGY RECOVERY PRODUCTS

AuraGreen™ Energy Recovery Products

- Direct drive plenum fans - AC or EC motor technology
- One and two core units with single wall steel cabinets
- Internal bypass for free cooling

Fixed Plate Total Energy Recovery Cores

- Reduced outside air load – both sensible and latent loads
- No moving parts for long life and easy maintenance
- Virtually zero leakage between airstreams
- No condensation – reduces environment for mold growth
- Great performance at low temperatures
- AHRI- certified performance

Energy Recovery Ventilators

- Wide range of stand alone unit sizes – with fans from 200 cfm up to 20,000 cfm
- Non-fanned units available
- Custom applications using ERV cores in your air handler cores

The Multistack Group™

Customer Driven Innovation

The right choice for the future... today.

OUR MISSION

To design and build reliable, energy-efficient equipment that fully supports the transition from fossil fuels to renewables through electrification.

OUR VISION

To create a world where environmentally sensitive design practice, reliability, and redundancy coexist and are embodied in the world's most advanced HVAC equipment.

SUSTAINABLE CHOICES

At **Multistack**, we recognize and respect the importance of providing HVAC solutions that promote energy and water efficiency, utilize the best refrigerant choices available, and embrace the transition from fossil fuels to electrification.

Water and air-cooled **MagLev**® chiller platforms achieve superb efficiency across their full range of operation. Our unique **MagLev** chiller design and unrivalled Transitional Efficiency chiller control algorithms deliver outstanding part-load performance at all condenser-water or ambient temperature conditions. **MagLev** also offers refrigerant choices recognized worldwide as safer for the environment: R-1234ze, R-513A, and R-515B.

Our modular product's design allows you the freedom to use just enough energy to meet your current needs, while offering you the flexibility of incorporating additional modules as your operations grow. Minimizing embodied energy is an important design focus and we pride ourselves that our modular chillers deliver the industry's highest cooling and heating output per pound. If you're looking to cool and heat your building with as little environmental impact as possible, look no further than **Multistack**!

Reach out to your local Multistack design professional to discuss how we can help you realize your design goals for:

- Electrification
- Energy efficiency
- Water usage efficiency
- Energy & heat recovery
- Choosing sustainable refrigerants
- Minimizing refrigerant charge
- Minimizing embodied energy
- Minimizing environmental and physical footprint
